Business Value:

Understand your safety data like never before.

Solution:

The NuclearN Safety Analyzer brings Nuclear-quality safety analysis to all utilities (T&D, Fossil Generation, and Utility Operations). Identify and correct gaps in your industrial safety programs, faster and easier than ever before.

Key Features:

OSHA Compliance:
NuclearN automatically applies a proprietary set of OSHA trend codes to your safety records, giving you insight into where regulatory findings may occur.

Accelerate Gap Identification:
The NuclearN Safety Analyzer lays out all potential gap issues on an easy to use bubble chart - allowing you to quickly spot correlated issues, take action and monitor improvement.

Trend Code Conversion:
Have custom trend codes and looking to migrate to a more standard feature set? NuclearN helps you convert and standardize, accelerating your safety program transformation.

Automated Reporting:
NuclearN Safety Analyzer integrates with NuclearN's built-in reporting functionality and PowerBI, enabling access to your data in any format you prefer.

About NuclearN:

Founded in 2021, NuclearN is an AI company made up of industry veterans with 35+ years of combined experience. We are nukes focused on helping other nukes.
